

Adaptive Learning

Start reducing study time for your learners by more than 30%

|| Adaptive learning is an approach to personalised learning.

When this approach is used within an online learning platform, it collects data from every learner. All this information is then used to create the most effective and efficient learning journey for each individual learner. ||

How does finishing a course 33% faster sound?

Our research proved adaptive learning can do just that!

This was the striking result of the study we conducted together with Bohn Stafleu van Loghum (BSL) on the importance of investing in personalised learning.

Our research shows that study time can be reduced by more than 30% without the loss of effectivity, self-efficacy and learner experience.
