

THE EXTREME LEARNING MAKEOVER DUST OFF YOUR DIDACTICS

Learning track 01 of 04

April 06th till April 18th

Dust Off Your Didactics

This is what you can expect for the first learning track of the Extreme Learning Makeover in the spring of 2021.

Live Online Learning: Everything You Need To Know

aNewSpring

We are all doing online lessons. Due to the circumstances, it has been a live online learning crash course. Sometimes formally, sometimes through learning by doing. Sometimes voluntarily, sometimes out of necessity. Everyone knows the easiest route: a Zoom session, but there are many alternatives for live online learning. How do you make the right choice? And then, which tool to use? In this longread, we'll cover the five main options for online learning and give you all the information to help you decide.

Next Gen Blended Learning

LAS

Blended learning has been around for as long as learning has, but the problem is; most blends are not human-centred. They take little account of the needs of the user, their limited attention span or memory capacity – quite simply they are designed for the ease of the blend producer, not the learner. In this video, LAS introduces their Next Generation Blended methodology, that addresses all of these issues and has been adopted by organisations like the BBC, Roche, Diageo and the Learning and Performance Institute.

What Works Better Online?

aNewSpring

What surprises did the past year bring to online learning? In a year where most of learning had to go online, we experienced more than ever what the differences were between face-to-face learning in a classroom and learning in a virtual environment. Let's take a look at the positive outcomes; the online methods that worked online better than expected. aNewSpring's Customer Success Managers share their experiences from working with training providers.

Make Knowledge Retention Work

aNewSpring

In this blog, Learning Specialist Roy de Vries will explain why and how specific retention training helps your learners remember what they learned. Roy will shortly discuss the theory of Ebbinghaus, 'retention through repetition'. He will then show how to effectively use online tools in your training or courses.

Blending in Virtual Classrooms

HBtraining

All signs point toward a truly blended future for learning. One that goes beyond mixing classroom training and e-learning, by creating a blend with asynchronous, live and offline learning experiences. In this webinar, HBtraining will show you how they incorporate virtual classroom training into a bigger learning programme. This increases effectiveness and makes it more attractive for learners.
