

INTEGRATION MADE EASY!

With the integration service from aNewSpring

As a training provider, you want to offer a seamless experience to your learner. Both offline and online and from start to finish. So all your tools and software packages need to talk to each other. Including aNewSpring. But what if the integration you're looking for isn't available yet?

If you want to, you can build your own integration using [the aNewSpring API](#). But that's quite a hassle. So if you'd rather not, that's no problem at all! With the aNewSpring Integration Service we connect our platform to other systems you use.

IT WORKS LIKE THIS

The simple version: you tell us which system you want to link aNewSpring to and who we should contact for technical questions.

Together we determine what wishes and requirements the connection should meet. We arrange the rest and take you through a successful integration step by step.

Voila!

THE BENEFITS AT A GLANCE

- #1 No hassle - aNewSpring takes care of creating the connection and the maintenance.
- #2 Live faster - we know our own platform like the back of our hand. And that saves time!
- #3 The best result - we know exactly what is possible, so we get the most out of the link.

THIS IS HOW YOU START

If you also want your own connection or if you are looking for more information then your regular contact at aNewSpring will assist you. Or email sales@anewspring.com or call +3110 310 3100.

“We chose **aNewSpring’s integration service** because we didn’t have any knowledge of creating an interface ourselves. .

Within no time they had it done and we received a short explanation of how it works so we could get started. It was really great how smoothly the process went and how much work this connection saves us.”
